RULES

1. All materials related to the course will be available in the Files section of the ***Fundamentals of Programming*** team or the https://github.com/cs-ubbcluj-ro/FP repository.

2. The attendance & grades situation are anonymized and available at https://tinyurl.com/fp-situation.

3. All activities must be attended with your own group/subgroup.

4. The maximum number of unexcused absences is 4 for the seminar and 2 for the laboratory. Failing to make attendance will make you ineligible to participate in examination during the 2024/2025 university year.

5. Unless otherwise stated, laboratory assignments must be turned in after 1 week to qualify for maximum grade. The penalty for delay is 1 point for that assignment for each week of delay.

6. An assignment cannot be delivered after more than 2 weeks after its due date (e.g., week 4 is the last week for handing in an assignment received during week 1).

7. The maximum number of assignments that will be graded during a week is 3.

8. The grade for an undelivered assignment is 0.

9. A minimum average grade of **5.00** for the laboratory activity is required to enter examination during the regular session.

10. Laboratory assignments will be delivered in person.

11. Assignments suspected of fraud, plagiarism or handed in without being able to explain its working principles and source code are graded with 0. Evidence of fraud or plagiarism during the examination will result in you immediately failing the exam.

12. The course employs a system of software-based plagiarism detection that will be employed during the laboratory activity and the practical examination.

13. **Have a great school year!** ☺
